

Good Webs for Good Sports

ACTIVE SOCCER™

Online Rosters and Dynamic Web Pages

for Youth Soccer

Make a Great Sport Even Better

Create your own soccer sports page and keep it up to date with the latest registration information, schedules, game scores, and upcoming events. Active Soccer™ lets you upload logos, photos, team data, and other important information quickly and easily. Powered by the patent-pending Active Profile™ engine, Active Soccer™ provides complete directory listings and web

pages with easy-to-use, customized templates. It's reliable and secure, quick to deploy, and much less expensive than other options on the market.

Publish important information with the click of a mouse

The basic online directory provides a listing of teams by name and age/gender group.

Active Soccer™ web pages enable coaches to publish schedules for practices, games, and tournaments, announce parent meetings, uniform

and equipment requirements, special events, and other helpful information. Parents will be better able to support the team's goals, know when and where their children are playing, and get a heads-up on upcoming important events.

Full featured and hassle free

Active Soccer™ is a web-based service that gives your league all of the features and benefits of on-site applications with none of the worries. There's no need to hire web developers, maintain a server, or install any new hardware or software. A single link on the existing site transports the viewer seamlessly to your league's directory and member pages. Serbus hosts all of the pages, handles all of the maintenance, and ensures that everything is in good working order.

Ten Good Reasons You Need Active Soccer™

1. Cut the costs and time associated with mailers, phone calls, and meetings.
2. Increase support for your league and team members.
3. Enable coaches to present team schedules, photos, and other information online.
4. Let coaches customize their team information as often as they like, without any need for special knowledge or tools.
5. Encourage greater parent awareness and help with their children's sports activities.
6. Plug and play with no on-site programming, servers, software, or databases.
7. Update online rosters and web pages easily and quickly, at any time, from anywhere.
8. Avoid unwanted banner ads of "free" web sponsors.
9. Send updates automatically to parents and team members.
10. Create a consistent, friendly identity throughout your league or organization.

Active Soccer™ is a product of Serbus, a leading developer of hosted, user-friendly web applications.

Click, Update, Communicate!

1. Simply click on the template blocks to create or update photos and text. To maintain the league's identity, the league chooses the logo, banner, and menu background color. Teams customize their individual pages with personal information, schedules, and photos.

2. Clicking an information frame opens a window for adding or changing text. Clicking a photo frame opens a browser window that lets you easily upload new photos and graphics.

3. Active Soccer™ displays the new text and images on the Internet as soon as they are entered, and automatically sends out an email “news flash” to alert parents and team members of the updates.
